

**SST AND ITS SUSTAINABILITY CONTRIBUTING
TOWARDS THE ECONOMICAL BOOST TOWARDS NEW
MALAYSIA – EMPIRICAL RESEARCH ON STRATEGIC
MOVE OF GST WITH SST**

Research statement

Malaysia witnessed a phenomenal change in its history after the independence by allowing the opponent party to take charge of the Governance. One of the major blow for the Barisan National party was economical instability and the announcement from the current ruling party on bring down GST at 0% and introduction of SST. However, after a year of change of Government and impact towards economy still instable and the impact of GST 0% with SST sustainability still questionable. The research trying to attempt a study on the impact of GST 0% with SST at 6% or 10% and its longevity in NEW Malaysia. Additionally, the study also trying to investigate on the acceptability of individuals and Corporate (s) on the GST 0% and SST at 6% or 10%. Further the study will focus on the remedial measures on the tax system (indirect) to contribute towards the economical growth of NEW Malaysia
