

SEA'S RG

South-East Asia's Study Research Group

Research Statement

As one of the region with the biggest population in the world, Southeast Asia (Nusantara) hold a very important influence and strategic role in the development of politic, religion, economy, technology, culture and heritage accross the globe. This research group will focus to initiate researches, discourse and studies in related with intrinsic and extrinsic values, customs, technology and trend of the region towards a common understanding and better future. It is expected by better understanding, we will have more mutual collaboration and partnership for the betterment of the people, environment and heritage in the region.

Keyword: Nusantara, Southeast Asia, Interdisciplinary, Study, Research.
